Premium E-Scooter from Hamburg

E-Mobility at the Highest Level

At Egret, we like to turn things up a notch. In terms of riding fun and in our product development. We develop up to 99 % of the components we use ourselves in Germany. We have been consistently setting standards in the industry since 2013. Our e-scooters offer individual e-mobility at the highest possible level. Every detail is the result of years of experience and underlines our claim to develop the best companions for short distances.

- German e-scooter pioneer and manufacturer with in-house development
- Design and construction in Hamburg
- Leading premium brand in the e-scooter industry
- Supplier to well-known companies
- Partner to the automotive industry
- Collaborations with market leaders in product development

Passion

and excitement for our form of mobility.

Pioneer

from the very start and trailblazer in the e-scooter culture for over 20 years.

Courage

to set new standards - We ride ahead, not behind.

Expertise

from the city of Hamburg: Product development to customer service.

Lineup

Egret Original

Our Egret Original models are what the name indicates: „Hamburg Originals“ 100 % engineered by Egret in Germany. Heart and soul and over 20 years of experience in the e-scooter industry flow into every carefully selected premium component. The result? Numerous international awards. And probably the best e-scooter on the market.

Egret One

Limited Edition

Egret One Limited Edition

A League of Its Own: The New E(xtra)-Class

The Egret One Limited Edition revolutionises what it means to build e-scooters. It is the result of first-class German engineering. From design to technology, from the first sketch to the last screw, it is the result of years of e-scooter expertise and many thousands of kilometres on the road. With features specially developed for it, also together with the big players Pirelli and Schaeffler, it sets new standards. Without promising too much: Once you set off, you never want to stop.

- › Custom-made premium components
- › The world's first Pirelli e-scooter tires
- › Innovative Schaeffler braking system inside the rim
- › Quick-change battery system
- › Fully integrated components & cable routing

Egret X+

The Offroad Revelation: Unstoppable Constant

The all-terrain Egret X+ also performs off the beaten track. Its large tyres and puristically designed tubular frame with robust aluminium mudguards are ideal for spontaneous tours in and outside the city. With the large 12.5" pneumatic tyres, the all-rounder keeps its grip even on demanding surfaces, and reacts unfazed by uneven, bumpy roads. Enjoy the feeling of smoothness and stability on- and offroad.

- › Extra large pneumatic tyres
- › Made for all trails
- › Stable handling
- › Integrated handlebar indicators

Egret Pro

Egret Pro

Freedom Beyond City Limits: Power in Style

Micromobility in its most beautiful form: The Egret Pro combines maximum performance, impressive range and stylish looks into a high-quality e-scooter. It is the perfect companion for the way to work, to sports or to the best places in town. The motor power sets new standards: 27 Nm provide fast acceleration and performance even with higher load. The powerful 48-volt battery draws on the full when others run empty. You have never experienced this kind of power!

- > Unstoppable performance for up to 80 km
- > Powerful acceleration
- > Modern, puristic design

New models for
international
markets launching
in 2025

Lineup Egret Ey!

The Egret Ey! e-scooters make exclusive quality inclusive. Developed in cooperation with the world's largest manufacturer of e-two-wheelers YADEA, and refined with the Egret Fit & Finish, every Ey! model is the symbiosis of Egret expertise and innovative product development. The motto: price meets performance. The result: the best, most affordable premium e-scooter on the German market. More models, also available for the international markets, will be launching in 2025.

Exclusively available in Germany.

Egret mate by tex-lock

No Chance for Thieves

The flexible textile lock Egret mate by tex-lock is the perfect anti-theft device for all Egret Original models. The bolt of the locking mechanism specially developed for Egret can be inserted directly into the (partially) integrated frame lock of the e-scooter after the cable has been looped around a lamppost or bicycle stand. Designed and produced in Germany, the cable lock consists of several cut- and fire-resistant high-tech layers and a hardened metal core.

- › Resistant to theft and attacks with bolt cutters, fire or saws
- › Extra-long 120 cm cable lock
- › Made in Germany 
- › In cooperation with  **tex-lock**
- › Locking mechanism integrated in the Egret e-scooter frame
- › For all Egret Original models

Phone Mount

Hands off the Phone

Navigation, Egret app, incoming messages or music control can be conveniently steered with the Egret Phone Mount.

Together with the SP Connect™ interface, the Egret Phone Mount is available for all common cell phone models. Simply mounted on the handlebar, the Phone Mount is the basis for attaching the cell phone with a case, clip or adapter from SP Connect™. Whether upright or in landscape format: the mount, developed in Germany and made of robust aluminium, is flexible and with only 80 grams a real lightweight. Thanks to the Twist & Lock system, the smartphone can be attached in no time and ensures a secure hold while riding.

- › Smartphone holder compatible with all Egret Original models
- › Design und construction in Germany 
- › In cooperation with **SP**
- › Easy & fast attachment
- › Relaxed and safe navigation or app control

Cargo Carrier

Leave Heavy Luggage Behind

The KLICKfix-compatible Cargo Carrier is compatible with the Egret X+ or Egret Pro and offers additional storage space for up to 10 kg. Whether light luggage, shopping basket or bag: despite the additional load, neither the handling nor the folding mechanism is affected.

Mounted simply and securely on the rear axle, the Cargo Carrier integrates seamlessly into the elegant Egret design. The aluminium construction ensures durability without adding much weight. The carrier has the right width for all common transport solutions, including UniKlip and KorbKlip from KLICKfix.

- › Design und construction in Germany 
- › Compatible with **KLICKfix**
- › Up to 10 kg load weight for backpacks, bags or baskets
- › Simple mounting on the rear axle
- › For Egret X, X+ and Pro

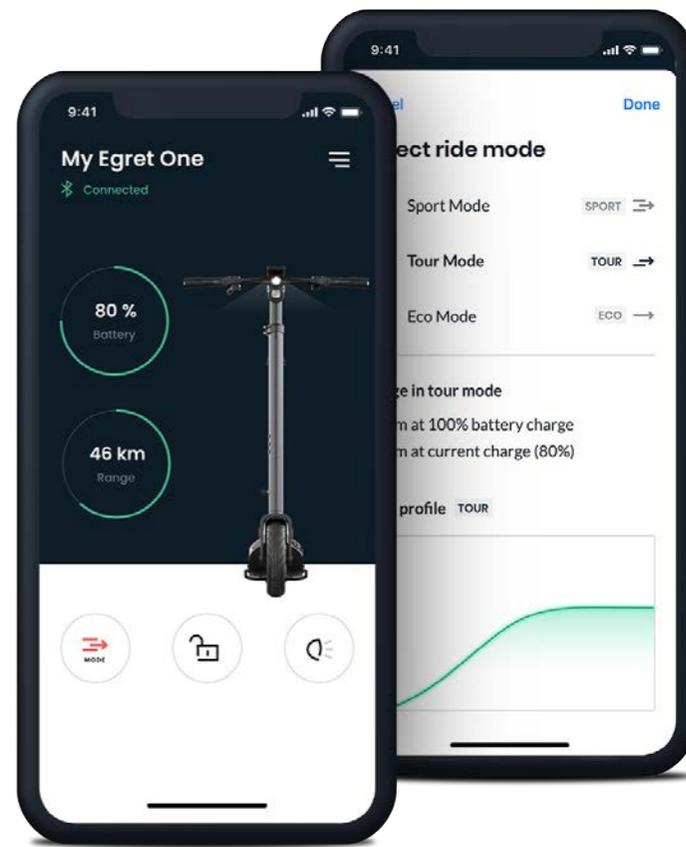

Egret App

Everything in View

Check the charging time of the battery. Know your remaining range. Change the riding mode. Activate the lock. Make service requests and track your online store orders. Receive news, offers and tips directly to your smartphone. Everything for all Egret Original and Egret Ey! models. All in one app.

Egret Solutions

Co-Branding & Fleet Solutions

Sustainable Micromobility for Companies

Your experienced e-scooter partner

For business customers we develop individual solutions for every use-case.

- > +20 years of industry & product expertise
- > Experience in working with renowned partners
- > Individual solutions
- > Suitable equipment from locks to quick chargers

E-scooter in your own design

From a certain purchase quantity, numerous customisations can be made to our products. From simple logo branding to your own design. Multiple well-known brands already rely on our engineering expertise and benefit from our many years of experience.

Sustainable corporate mobility

For use on the company premises, as a flexible mobility solution for employees or fun for guests: your Egret e-scooters are always ready to go.

- > Emission-free micromobility
- > Special conditions for company fleets (purchase or leasing)
- > Tax advantages
- > Happy employees & guests

More information:

My Job Scooter

E-Scooter-Leasing for Companies

Big benefit, small effort: Employers can lease our premium e-scooters through our leasing partners Eleasa, jobroller and Deutsche Dienstrad GmbH and give them to their employees for free use through attractive salary conversion. Full-service leasing results in savings for employees and employers.

Benefits for employers

- ✓ Reduction of non-wage labor costs through salary conversion
- ✓ Promotion of individual micromobility
- ✓ Sustainability: contribution to emission-free mobility in the company
- ✓ Employer branding: employee recruitment and retention

Benefits for employees

- ✓ Save costs: up to 35 % savings compared to direct purchase
- ✓ Flexible and cost-effective mobility
- ✓ Private and business use for leisure and commuting
- ✓ Service, maintenance and insurance package included

My Abo Scooter

Flexible Mobility with an E-Scooter Subscription

Uncomplicated, flexible and all-inclusive: Germany's first premium subscription for e-scooters with everything you need for unlimited riding fun at any time. No purchase hurdles, no registration or insurance stress and no hidden costs. Whether you want to test Egret for a summer or radically start your car-free year: The subscription plans offer fairly staggered fixed prices for every period of use and every purpose. Just you, your Egret e-scooter and your goals - starting from 3 months.

Unlimited riding fun at a fixed price

A monthly all-in fixed price including lock & license plate.

Rent or buy: your choice

With flexible terms of 3-12 months or an individual purchase offer on request.

Safe, carefree and super-relaxed

We take care of shipping, maintenance, registration and insurance.

Available only throughout Germany
